

GaraGlide Roller Garage Doors

NEW electrically automated roller door, available in a full range of custom door sizes

NEW

Electrically operated
roller door with
2 hand transmitters

Introducing GaraGlide

The GaraGlide combines a space saving design with the convenience of an electrically operated automatic door. The door lifts vertically and rolls into a box at the head of the garage door opening, providing more space in front of the garage and inside the garage than a traditional garage door design. Choose from a full range of standard colours and made-to-measure door sizes up to 5000mm wide.

Electrically automated as standard

The GaraGlide is an electrically operated roller door, driven by an automated tubular motor and supplied complete with two remote hand transmitters. Comes with crank handle for emergency release in case of power failure.

Space-saving design

Made from aluminium foam-filled laths, the door curtain lifts vertically, then rolls into a box at the head of the garage door opening. This provides a compact solution for instances when access to the roof or ceiling space inside the garage is required.

A good seal all round

A sturdy rubber seal at the bottom of the door curtain and brush seals inside the guide rails, helps to prevent drafts inside the garage and stops unwanted leaves, dust and dirt blowing into the garage.

Mechanical stop for security

A mechanical stop between the top lath and the roller barrel, prevents the door from being lifted by an intruder when in the closed position.

Functions, features and additional options

1 Box cover as standard

Supplied with a complete box cover, which encloses the door curtain, protecting it from damage and dirt when the door is open. Also prevents fingers from becoming caught or trapped, when the door is closed.

2 75mm or 105mm pre-drilled guide rails

Three pre-drilled holes on each guide rail and one inside the box cover firmly fixes the frame structure to the brickwork and further reduces installation time. Plastic plugs for each hole provide a seamless finish.

3 Control panel with integral LED light

Features an internal LED courtesy light with a 2-minute delay to help with ease of entering and exiting your garage.

4 Emergency release

Supplied with crank handle so the door can easily be opened from the inside in the event of a power failure.

External emergency release (optional)

An optional external crank handle means you can open the door using the crank handle from the outside. The external crank handle is attached to an opening, that is lockable with a locking cylinder for security. The door can also be operated from the inside via divisible linkage.

Additional fascia panel (optional)

The additional fascia panel stabilises the main fascia panel, when fitting the door between or behind the opening. It provides a neat appearance, accompanying the lintel without any unattractive fitting holes. Available in colour matching the door or timber effect.

Wired or wireless optical sensor

The GaraGlide is available with either a wired or wireless optical sensor, to recognise when there is an obstruction in the door curtain's downward path and safely stop the door.

Wired optical sensor

A wired optical-sensor is fitted into the floor seal for added safety. In the event of an obstruction to the door curtain coming down, the light beam from the optical sensor is broken, and the door will stop and reverse.

Wireless optical sensor

A wireless optical sensor is also available, without the spiral cable. The optical sensor is fitted into the floor seal, and when the light beam is broken, the door will stop and reverse. Batteries are required for this device.

Choose from a range of colours and accessories

Colour options

1. Traffic White (RAL 9016).
2. Light Ivory (RAL 1015).
3. Ruby Red (RAL 3003).
4. Purple Red (RAL 3004).
5. Steel Blue (RAL 5011).
6. Moss Green (RAL 6005).
7. Slate Grey (RAL 7015).
8. Anthracite Grey (RAL 7016).
9. Light Grey (RAL 7035).
10. Terra Brown (RAL 8028).
11. Cream (RAL 9001).
12. Jet Black (RAL 9005).

17. Golden Oak (timber effect).
18. Rosewood (timber effect).

Golden Oak and Rosewood available in either a deco paint or foil coat surface finish.

Printed colour samples are as accurate as printing techniques allow.

Mobile radio accessories

4 button bisecur hand transmitter. Features 4 control buttons and an eyelet for a key ring. The 4-button hand transmitters can be programmed to open up to 4 garage doors. It is supplied in a sleek matt black textured finish.

2 button standard hand transmitter. Features 2 control buttons, for operating up to 2 doors and a keyring eyelet at base of transmitter and fits comfortably in your pocket.

Glazing and ventilation options

Foam filled profile

The aluminium profiles are 77 mm high and are filled with polyurethane rigid foam for strength and a quiet door travel.

Windows

Add a window for an individual design and the use of daylight in your garage. The number of elements depends on the respective door width. A maximum of ten profiles can be fitted with glazings in each door.

Ventilation grilles

Ventilation of your garage improves the room climate and prevents mould. A maximum of ten profiles can be used for each door.
